Dear Sirs

Re: SID Planning application for the 110KV Colehill Substation and grid route to support the solar development at Ballyteige and Derrygrogan, Co Offaly

I confirm that we have been contacted by RES Group who are working on behalf of Ballyteige Solar Limited (Applicant) and RES have provided details of the planning proposal including drawings/location maps showing proposed Horizontal Directional Drill across the dry canal carrying three 33kV circuits, temporary and permanent road widening on the Wood of O at two pinch points, road reinstatement details, joint bay, link box chambers and c.700m of 110kV cabling and one joint bay within Wood of O road.

Should planning be granted, Waterways Ireland supports a Wayleave Application from Ballyteige Solar Limited where detailed drawings of the proposed works adjacent to or under the canal will be provided.

Yours faithfully

Carey Robinson BLE Hons MRICS
